

The Present and Future of Supply Chain enabled E-Invoicing Software is here.

Stay GST Compliant and Secured.

The role of Aliter's e-invoicing software

- The government has set to bring a technological revolution in the tax structure, building a digital ecosystem with the mandatory applicability of e-invoicing software for all businesses with a minimum turnover of Rs.100 crores. This creates a landscape shift for businesses as they are geared to cope with these changes and evaluate their technology readiness.
- It is imperative to opt for a solution that provides a comprehensive framework and assists the business to smoothly navigate the e-invoicing processes. Aliter's ERP paves the way to being at the forefront and eases the adapting process with smarter solutions.
- It comprises essential compliance specifications and beyond. The software aids in easier documentation and eliminates transcription and other human errors in the GST reporting process.
- Since this highly advanced software has every possible feature built-in like Token-based Class 2 Digital Signature, GST QR Code, Customer Specific QR Codes, Automailing, Auto e-way bill generation, Integration to IoT Devices for Outbound and Inbound Shipment Tracking etc. that saves time and extra cost, especially now during the pandemic, going paperless becomes the safest option.

- There's no need to worry about the GST as 100% effort is met in complying with GST requirements. It makes sure the party is a trusted source and that they have made the tax payment on time
- Aliter's e-invoicing software is fast and secure with an impressive average turnaround time from Invoicing to a GST enabled Invoice, is about 20 seconds. There's seamless integration with the existing ERP to automate the invoice registration process on IRP. So the user can continue using the preferred invoicing method without any changes. It is specifically designed to meet the green initiatives of the business.
- There is no need for any multiple solutions for Digital Signatures, No Customization in ERP Software for QR Code Printing, Automailing rules, Shipment Tracking, Reconciliation etc.
- It has the capacity to upgrade and support expandability to new features; one such area is Supply Chain Management by updating the GPS system to facilitate outbound shipping tracking, RFID based Material Tracking.
- The seamless integration of e-Way Bill Generation with the portal makes the entire process plain-sailing. The taxpayers are given the option of simultaneously generating the e-way bill with the invoice.

Key Benefits of Aliter's E-invoice Software

By e-invoicing, unnecessary steps like manual data entry, accuracy check, and swapping software are eliminated. There is also the elimination of extra software for Digital Signatures, QR Codes, Emails. On top of that, there's no scripting required for emails or any SFTP File transfers. Since it's lightweight, the concerned person can also operate from a Mobile, Desktop, on-premise or on-cloud or hybrid. Moreover, it's fast and quick, generating the invoice within 45 seconds.

- Web and Mobile-enabled
- No limit on the number of users using the application
- Simplified GST compliance
- Security & Precision
- e-Way Bill Generation

- Quick & Hassle-free
- Trusted Buyer/Seller
- Elimination of multiple solutions
- Abolition of Paper
- Lesser reconciliation errors
- Software Evolution
